

# Art

P-6

## Title – Paper Sculpture. Art Elements – Line/Shape/Form/Space/Colour

### Materials.

You will need a base to glue your pieces on. You could use cardstock or cut up a biscuit/cereal box.

Coloured construction paper strips. (thicker papers hold shape better)

You could use coloured printing paper/wrapping paper/add your own colour decorations to white paper.

Glue stick/PVA/scissors/textas

### Instructions.

#### You will turn flat 2D strips of paper into 3D forms.

Cut colourful strips of construction paper and change their shape.

Make 'feet' (fold tabs) on the ends of your shapes, so you can glue them on to your base.

Try to make all your strips look different.

If using PVA, use a small amount to get the best result.

### Some shapes to try.

**Zig-zags** – fold forwards and backwards.

**Curls** – hold strip on a pencil and wind it around and around, then slide out the pencil.

**Arches** – fold 'feet' (tabs) on each end of the strip and glue each end. Glue the feet far apart to make a wide arch & closer together to make a taller thin arch.

**Fringes** – start with a wide strip & cut fringes into it.

**Cylinders** – start with a wide strip, roll it & glue the ends together. Cut slits around the bottom and fold them all out so you can glue it on to the base.

### Can you make up some different combinations?

For example, can you make a double ended curl? Can you make zig zag fold fringes? Get creative and invent some more.

Make them go over & under. Can you attach some on top of others?

Fill your base with lots and lots of colourful 3D shapes.

Take some photos of your work!
